

Revision February 2023

With this document we intend to formalize precise environmental guidelines in order to establish our commitment and our ambitions in terms of environmental sustainability of our processes, products and services.

As mechanical manufacturing company we work to maintain and develop our position on the market by committing ourselves to build molds that satisfy the customers, that today are asking us to implement the logics of sustainable development for the control and containment of the impacts on environment and to make the best use of all the resources involved.

In particular we intend to carry out the following:

- We commit ourselves to be constantly updated and conformed to the requirements of environmental laws and regulations issued by the competent authorities.
- We want to contain our environmental impacts with organizational and technological interventions and prevent the pollution of water, air and all other environmental aspects involved.
- We intend to safeguard the natural resources, reduce energy consumption, waste of raw materials and accessory products and encourage their recovery and recycling.
- Effect on the environment, optimal use of energy and natural resources will be considered in taking decisions for new processes and related investments.
- We intend to extend to our suppliers, as far as possible, our attention to the management and to the respect of environmental laws and regulations.
- We will define targets to improve our environmental management and we will commit ourselves to achieve them.
- We want to promote awareness and responsibility of our staff towards the protection of environment with awareness-raising actions, information and operating instructions for the control of the activities.
- We have organized our Environmental Management System according to the ISO 14001 standard, distributing activities, responsibilities and tasks for the complete operation of the system.

We ask to all involved people for an active and continuous cooperation for the implementation of the indications expressed above.

This Policy has to be made available to all interested internal and external parties.

Pontoglio, 08 February 2023
